

SERVING YOUR BUSINESS

AUTOMOTIVE

Expertise

Throughout our network of 21 ports around Britain, our expert and highly trained teams are ready to work in partnership to deliver the solutions your business needs. Around 40% of all UK automotive imports and exports are handled by an ABP facility. We move almost 2 million cars a year through our ports on the Humber and in Southampton. Efficiency is at the heart of our offering, backed by our expert, quality-assured handling services and performance-tracked quality assurance.

Our aim is to reduce transport time and costs by streamlining the process from start to finish. We will work with you to optimise cost efficiencies, using our extensive experience and track record of working as a trusted partner with some of the largest brands in the automotive industry. ABP offers a complete supply chain solution that ensures our customers' vehicles move safely and efficiently through our ports.

We work flexibly and collaboratively with you and constantly invest in our operations to offer the best services available, as well as the room you need to grow your business.

“ ABP offers a complete supply chain solution that ensures our customers' vehicles move safely and efficiently through our ports.

”

Facilities

ABP offers the latest state-of-the-art facilities and equipment to deliver automotive handling solutions and value-added services.

We understand that you and your customers need safe and time-efficient handling, keeping control of your costs. ABP's extensive portfolio of facilities, backed by well-equipped stevedoring operations and other services, will help your business achieve that objective.

Committed to evolving along with our customers, we are investing to expand and improve our specialist automotive port facilities and services. This includes a £50 million investment in new vehicle handling facilities at the Port of Southampton, increasing our vehicle storage capacity to accommodate growing industry demand. We have also invested in infrastructure to handle growing vessel sizes, such as the £26 million Grimsby River Terminal.

ABP has the capability to invest and construct facilities tailored to suit your business needs.

Connectivity

ABP's deep water and short sea ports give our customers unrivalled access and connectivity. Our key automotive ports have best-in-class rail and road connections allowing efficient transit to and from the UK's key manufacturing and distribution hubs. Our ports are on the regular call schedule for the major automotive shipping lines, giving unparalleled access to European and global markets.

ABP offers you and your customers an expansive range of locations, routes and logistics solutions for import and export flows.

Contact

We are ready to help deliver the solutions your business needs. For more information, contact our automotive sector expert, Brian Steeds.
