

## NOTICE TO MARINERS

### Restricted Locks

UTC  BST

Mariners and port users are advised from today to Friday 5<sup>th</sup> April there may be restricted lock times in force. This is due to neap tides and a HW predicted at only 2.8m, therefore not replenishing the water level above minimum locking levels.

ONS are making every effort to preserve the water levels of the wet dock. If required on these days there will be 1x Lock Out on the even hour and 1x Lock In on the odd hour. If water levels are very low there is the possibility of no locks 1 hour either side of Low Water.

If there is a large surge the restrictions could be lifted earlier.

Please contact ONS (Orwell Navigation Services) for more up to date information.
