

Introduction:

Since the initial outbreak of COVID-19 in the UK, ABP has developed guidance on how to stay safe in the workplace and communicated this to our workforce. The guidance and communications have consistently reflected and aligned with Government guidelines to allow for the practical and necessary steps to prevent and limit the transmission of the COVID-19 virus within the workforce. This document further considers the Department for Business, Energy & Industrial Strategy's guidance to help employers understand how to work safely during the coronavirus pandemic and how we have implemented that guidance within ABP.

Purpose:

The purpose of this assessment is to ensure that the risks posed by COVID-19 to the health of our employees, contractors, visitors etc. across the business are assessed in a consistent and effective manner. The emphasis of this generic risk assessment being to consider and apply control measures to continue our objective of preventing the spread of COVID-19. It puts on record, the process by which ABP has continued to manage our workforce's exposure to COVID-19 since the beginning of the outbreak.

This document is not intended to and does not replace more detailed risk assessments and safe systems of work relating to our operations and sites.

Scope:

The scope of the document applies to all ABP sites and functions and is supported by our risk assessment and guidance for scenarios where social distancing cannot be maintained.

Principles:

The Government has, in collaboration with Public Health England (PHE) and other organisations including the Health and Safety Executive (HSE), assessed the risks in relation to COVID-19 exposure. As a result of that combined assessment, those bodies have identified the principal control measures required to prevent and minimise transmission of the COVID-19 virus in both public-and workplace settings. Our workforce, visitors etc. will be familiar with those measures so for that reason, ABP have adopted those same measures as a set of 'guiding principles' on which to base our own controls. Where appropriate, this will help 'smooth' the transition from a non-working, to a working environment.

Methodology:

Due to the unique nature of this pandemic situation, the actual level of risk in any given work scenario is unknown. Also, new information and guidance appear and change on regular-, sometimes daily, basis. Taking these factors into account, we decided at an early stage that the quickest and most effective way of identifying and implementing control measures was to start off the process by first providing a set of 'Guiding principles'. Latterly, we introduced a checklist of 'Things to consider'.

By not being overly prescriptive, we allowed those responsible for identifying, implementing and managing control measures at a local level to be flexible in their approach. This enabled them to tailor control measures to suit their own particular and frequently, 'unique' set of circumstances e.g. staggered shift times and breaks. As a result, the process has proved to be an effective method of engaging with the workforce who have been instrumental in identifying, implementing and importantly, following, sitespecific controls.

The over-arching philosophy is based on the well-established hierarchy of risk controls starting with elimination of the hazard e.g. working from home, through to the provision of personal protective equipment (PPE) as a control measure of last resort.

The 'Guiding principles' mentioned above are as follows:

- All our colleagues who can work from home are expected to do so and we will provide the
 equipment to allow them to do that;
- Handwashing facilities and/or sanitiser will be made available at each workplace or on personal issue for colleagues with no fixed workplace;
- Take all reasonable steps to maintain a minimum of 2 m separation between personnel.
- Where a 2 m separation between colleagues cannot be maintained, we will take all reasonable steps to minimise transmission of the virus from one person to another.
- Employees in the 'vulnerable' category will be assessed on a case by case basis, based upon medical advice.

Notwithstanding these five principles, we will always consider the impact or effect any COVID-related control measures may have on other risks associated with tasks e.g. team lifting to reduce manual handling risks.

The checklist of 'Things to consider' can be found in Appendix A. The checklist will be sent via cascade from Regional or Head Office Leadership Teams to their respective managers or a nominated responsible person at each location. Where operations have continued during the COVID situation, the manager/responsible person will use the checklist to cross-reference against the controls that are already in place. Where work has not yet recommenced, the manager/responsible person at each location will use the checklist to determine the appropriate control measures required to be in place prior to instructing colleagues to return to the workplace. When all necessary control measures are in place, the manager/responsible person will confirm that is the case to their respective leadership team.

Monitoring, audit and review of this process will be carried out as described in the appropriate sections below.

Communication:

For those control measures that are not immediately visible in the workplace e.g. screens, floor markings etc, we will use the following communication streams to ensure colleagues and visitors are made aware of the control measures in place on our sites:

- iPort:
- Toolbox talks and pre-shift briefs;
- Site inductions;
- Posters;
- On-site TV screens;

- E.mails;
- Letters to customers and direct mailing to colleague's home addresses;

Monitoring:

Until such time as a review deems it no longer appropriate, we will carry out the following monitoring activities:

- At a Regional level, ABP will maintain a daily record of all COVID-19 related absences and a weekly record across the business;
- A record will be maintained of stocks of personal protective equipment, soap, sanitiser and other equipment provided to be worn or applied to protect against COVID-19 infection and transmission;
- A record will be maintained for each business unit, port, depot, location, office, function etc. that the 'Things to consider' checklist has been completed. Regular assurance checks will be carried out by regional Health and Safety teams.

Audit:

COVID-19 related measures will be incorporated as a topic and covered in our existing audit plan visits.

Review:

Rather than stipulate a time-based revision period, a review of this risk assessment will be triggered when there is reason to suspect that it is no longer valid or there has been a significant change, for example:

- feedback from consultation with the workforce;
- localised changes to the threat of infection;
- national changes to the threat of infection;
- changes to the consequence of infection;
- relevant changes to Govt. guidance or legislation;
- any event (including inspections, audits etc.) that calls into question the validity, effectiveness or practicability of any of our existing control measures.

A record of reviews and revisions to this assessment will be kept in Appendix C.

Governance:

The Leadership Teams of each region will be accountable- and take responsibility for tracking and monitoring progress at a local level. ABP Exec. will have overall Governance across the Regions and Head Office.

Relevant legislation:

Health and Safety at Work etc. Act 1974

The Management of Health and Safety at Work Regulations 1999

The Personal Protective Equipment at Work Regulations 1992

The Workplace (Health, Safety and Welfare) Regulations 1992

The Health Protection (Coronavirus, Restrictions) (England) Regulations 2020

The Information and Consultation of Employees Regulations 2004

The Health and Safety (Consultation with Employees) Regulations 1996

The Safety Representatives and Safety Committee Regulations 1977

APPENDIX A - Checklist of 'Things to consider'

No	Subject	Status			
Buildings:					
1.	A basic calculation has been undertaken for each building/office to ensure and allow for				
	maintaining the 2-metre social distancing				
2.	Kitchen areas are paid particular attention with the implementation of strict maximum				
	numbers permitted at any one time to maintain social distancing				
3.	Kitchen areas have strict regular cleaning regimes, including: fridges, worktops,				
	dish clothes, tea towels, floors, etc				
4.	Waste bins in rest rooms and kitchens have liners, sealed lids and are emptied regularly				
5.	Rest areas are paid particular attention, these should be organised in a way that social				
	distancing can be maintained, whether by rotation of breaks or providing additional separate				
	facilities, such as, other rooms or temporary buildings/cabins				
6.	Reception areas are reviewed to allow for social distancing, signage, floor-marking and				
	screens should be provided where appropriate and practical to do so, hand sanitiser should				
	also be made available (Visitors should be kept to an absolute minimum)				
7.	Where practical to do so, one-way systems are used to support social distancing measures				
8.	Passenger lifts should only be used by one person at a time to allow for social distancing				
9.	Where there are individual offices, colleagues should be encouraged to consume their lunch				
	within their office, thus easing congestion of communal areas, such as rest rooms or kitchens	_			
10.	Water systems, showers, sink taps, water heaters should be run off to prevent potential for				
	Legionella related issues arising, competent contractors should be engaged if in any doubt				
11	Where reinstating IT equipment, all cables must be kept secure and tidy to prevent potential				
	tripping hazards				
12	Meeting rooms should be well ventilated with open windows where practical to do so and				
	maximum persons per room should be established and communicated to allow for social				
	distancing to be maintained				
13	Signage should be displayed at all entrances notifying all colleagues and visitors of the need to				
	comply with social distancing				
14	Notices should be displayed on any external gatehouses and main office doors indicating				
	access by pre- arranged appointment only				
15	Interaction at external and office weighbridge areas must be kept to a minimum, where				
	practical windows should be kept closed and handling of paperwork eradicated or kept to an				
	absolute minimum				
Hygie	ene:				
1	Hand sanitisers should be provided at all entrances with notices to use before entry				
2	Were applicable, wedge open internal doors to minimise the need for contact with door				
_	handles (fire doors should be considered)				
3	Where necessary, cleaning contractors work should be extended to ensure regular cleaning of				
	contact points to prevent potential contamination				
4	Arrangements in place to clean toilets, showers and washrooms, provide soap and signs				
	displayed reminding people to wash their hands regularly				
5	Where practical anti-virus cleaning fluids should be available so colleagues can ensure regular				
	additional cleaning where required				

No	Subject	Status				
Vehi	Vehicles and Plant:					
1	Wherever practical only one person should occupy company vehicles, (vans) where this is not					
	possible, then maximum of two persons but maintaining distancing by using diagonal sitting					
	positions from front to back seats					
2	Vehicles and plant should be kept clean and where appropriate and required the interior and					
	touch points regularly wiped down with antiviral wipes					
3	Vehicles and plant should be parked, accessed and egressed in a manner that supports social					
	distance.					
Visit	ors and Contractors:					
1	All visitors and contractors should work within CoVID-19 guidelines to support the potential to					
	minimise risk of spreading infection, the ports should be clear of who is visiting, when, what					
2	for and that they are aware of ABP controls Contractors working on projects must comply with all health and safety regulations and					
2	observe the CoVID-19 social distancing requirements, visitors to developments must be kept					
	to an absolute minimum					
3	Ships agents and cargo surveys being asked to work from their cars but still being given access					
	to WCs / facilities.					
Perso	Personal Protective Equipment:					
1	The normal five-point PPE policy remains and applies to all employees					
2	Where appropriate masks should be worn to prevent the potential for transfer of infection					
Heal	th and Wellness:					
1	If individuals start to feel unwell and appear to be showing signs of ill health, such as high					
	temperature, coughing, loss of smell and or taste, then they must inform their line manager					
	immediately					
2	Individuals who become unwell at work and are showing symptoms of a temperature and/or					
	constant cough should go home immediately and self-isolate, contact should be made with					
	the Line Manager/HR to arrange for testing					
3	If the individual becomes so unwell that they are unable to go home, then they should isolate					
	in a suitable room and emergency medical support should be immediately requested					
4	Once medical emergency services have arrived, then the manager should ensure their advice					
	is followed					
5	If the individual is classed as 'vulnerable', have they taken independent medical advice and					
	can that advice be followed e.g. conducting their work whilst maintaining social distancing at					
	all times					
Communication:						
1	Systems in place to inform the workforce of the control measures and arrangements in place					
	to control the risks from COVID-19 and prevent transmission of the virus.					

Appendix B – Guiding Principles poster

Staying COVID-19 Secure in 2020

We confirm we have complied with the government's guidance on managing the risk of COVID-19

FIV	ES	TE	PS	TO	SA	FER	-
WC	RK	(IN	G 1	TOG	ETH	HER	

- We have carried out a COVID-19 risk assessment and shared the results with the people who work here
- We have cleaning, handwashing and hygiene procedures in line with guidance
- We have taken all reasonable steps to help people work from home
- We have taken all reasonable steps to maintain a 2m distance in the workplace
- Where people cannot be 2m apart, we have done everything practical to manage transmission risk
